

iStationery Holder

Written By: Kee Wan

TOOLS:

- [Decorative scissors, scalloped-edge rotary cutter, and/or hole punch \(1\)](#)
- [Drill \(1\)](#)
- [Measuring tape/ruler \(1\)](#)

PARTS:

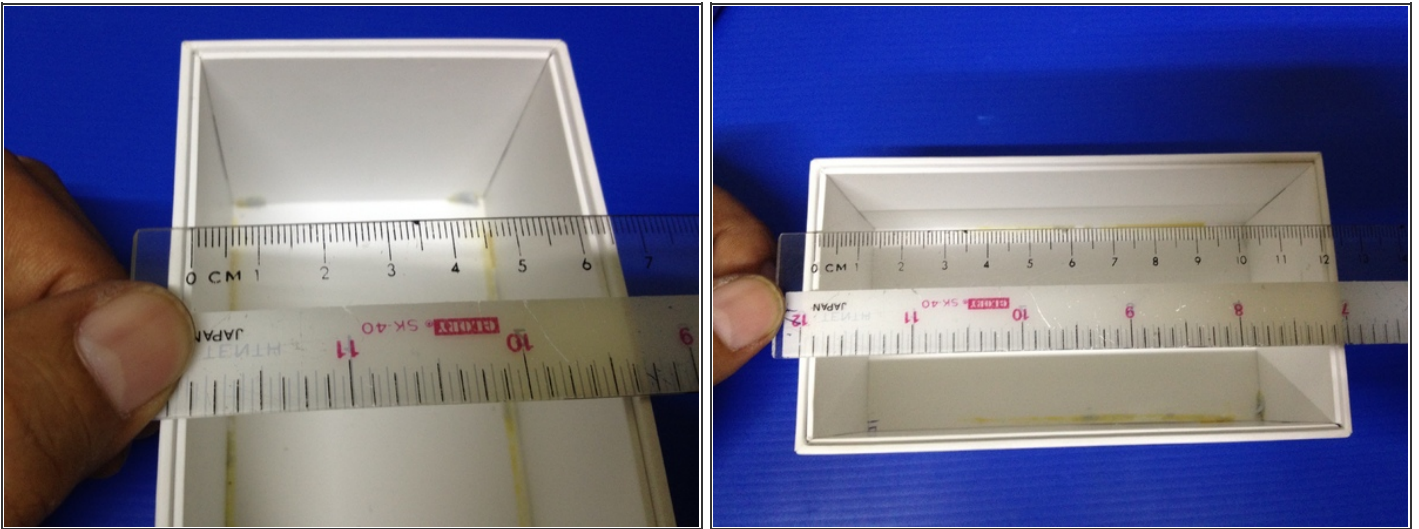

- [empty box \(1\)](#)
- [Piece of coroplast or cardboard \(1\)](#)

Step 1 — iStationery Holder

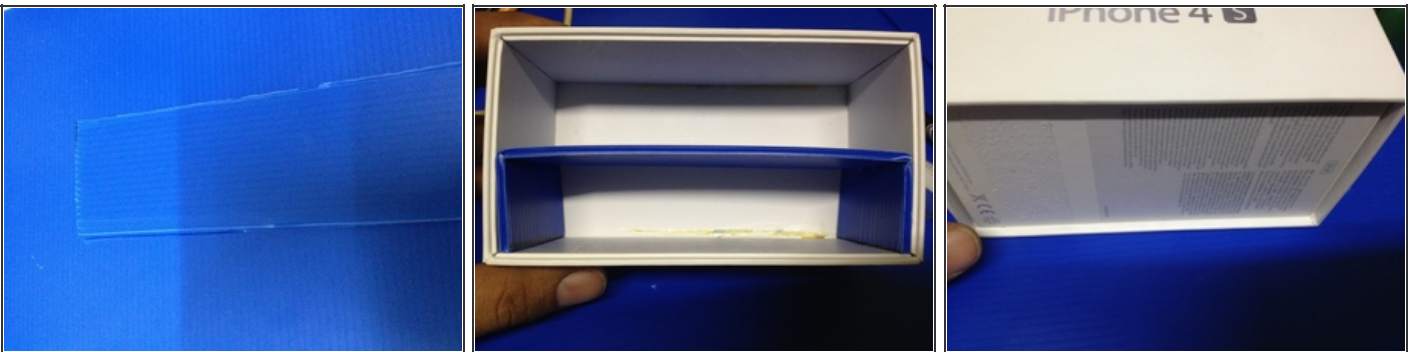

- Start with an empty box that is large enough to hold your stationery.

Step 2

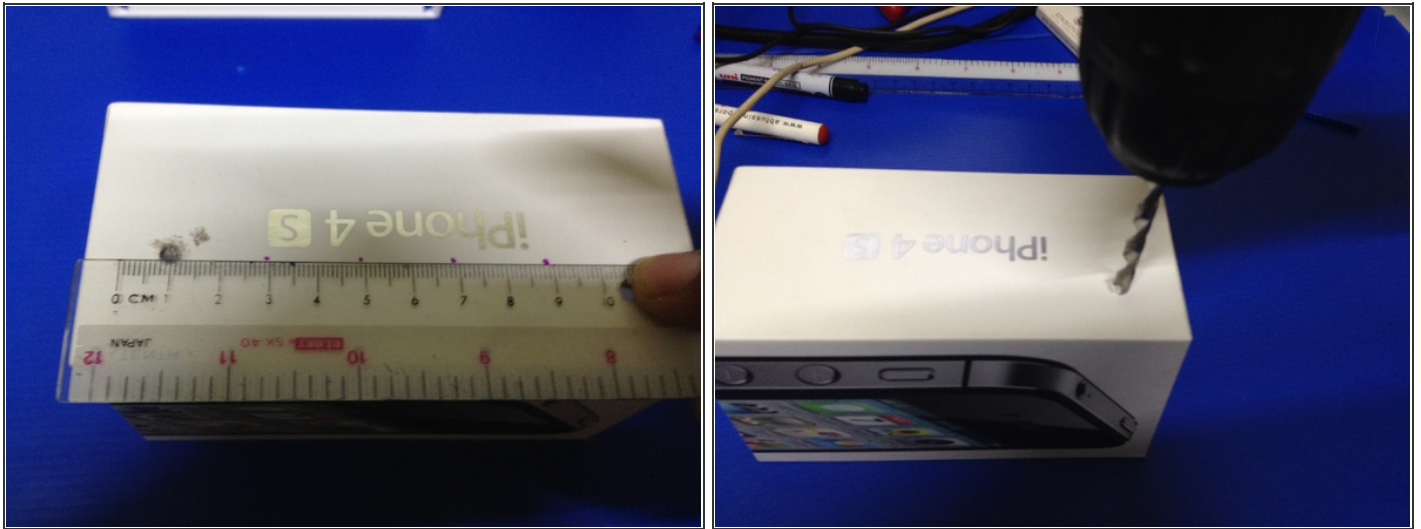

- Measure the length, breadth and depth of the inner box.

Step 3

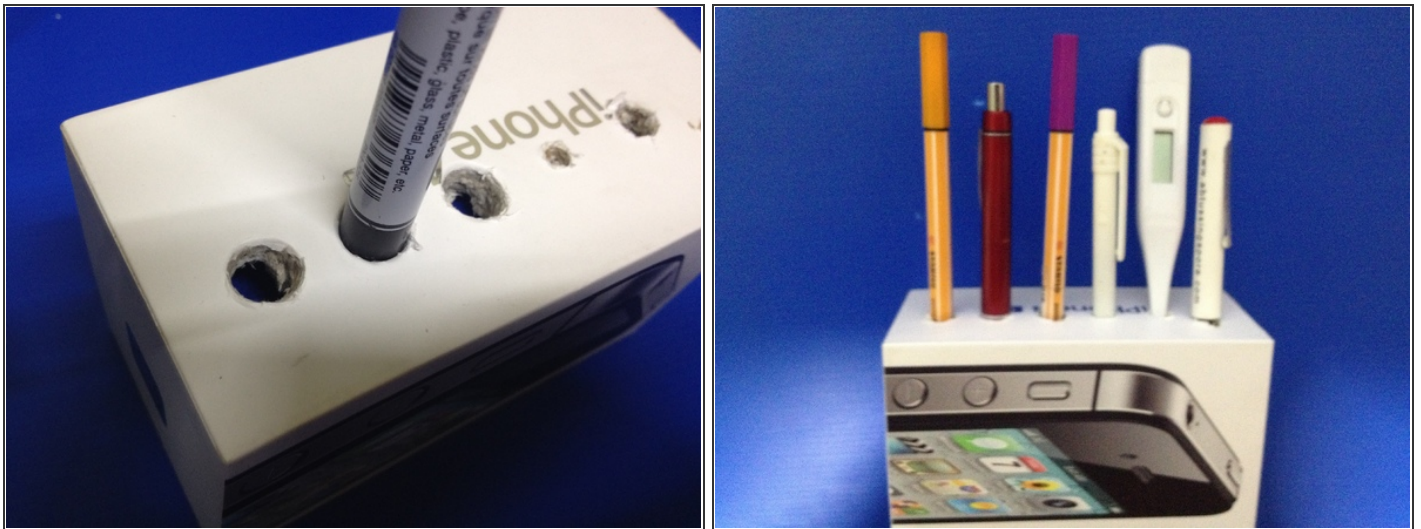

- Take a plastic coroplast sheet and cut out a piece whose width is equal to the depth of the box, and whose length is equal to the length plus the width of the box.
- Fold it into a bracket shape and insert it into the box as shown in photo 2.
- You will reassemble the box when the project is finished.

Step 4

- Take the outer box and make marks on the top every 20mm.
- Drill holes at your marks.

Step 5

- Smooth the holes with scissors or a pen.
- Insert your pens and pencils into the holes.

Step 6

- Put some writing paper into the box, reassemble it and enjoy your stationery holder.
